red beet root

Oola.

The Oola Shot delivers an all-natural brain and body boost to help you stay clear and focused. This proprietary formula is the balanced blend of nutrients your body and brain need to work towards crushing your goals. It's not just energy - it's Smart Energy!

WHAT IT DOES

- Provides a natural and jitter-free boost for your brain and body
- Supports focus and mental clarity towards your action steps and goals
- Promotes nitric oxide production for overall health and wellness

HOW IT WORKS

- The combination of green tea extract and coffee cherry extract helps boost metabolism and support balanced energy
- Packed with 1000 mg of red beet extract to stimulate nitric oxide production
- Taurine and B-Complex support healthy cognitive function and energy levels

PER SERVING:

1500MG
TAURINE

65MG
CAFFEINE

1000MG
RED BEET POWDER

WHAT ARE THE BENEFITS?

BALANCED AND ALL-NATURAL ENERGY

The demands of life mixed with taking your daily action steps require high energy levels. We combined green tea extract and cherry coffee extract to provide you with an all-natural caffeine boost your body needs to work towards your goals. This balanced and long-lasting energy comes without the jitters or the crash!

PROMOTES NITRIC OXIDE PRODUCTION

Each Oola Shot delivers 1000 milligrams of powerful red beet extract to help stimulate nitric oxide production. This boost is essential for overall health and enhances the flow of blood, nutrients, and oxygen to every part of your body effectively and efficiently.

SUPPORTS FOCUS AND MENTAL CLARITY

The B Complex micronutrients support vital body function while helping your concentration and mental clarity. Combine that with the proven performance and productivity-boosting effect of Taurine, and you have the perfect combination for Smart Energy!

KEY INGREDIENTS

GREEN TEA EXTRACT: 130 MG

A potent plant extract from green tea that promotes full-body antioxidant support and neurotransmission with a balanced dose of caffeine.

VITAMIN B-12: 24 µG

A micronutrient that is essential for producing cellular energy and plays a vital role in forming red blood cells, which are the cells that deliver oxygen to all parts of the body, including the brain.

RED BEET ROOT POWDER: 1000 MG

A superfood that supports the production of nitric oxide, a process that is vital for survival. Research shows that nitric oxide levels decline dramatically with age, and increasing these levels can help boost energy, endurance, and stamina.

VITAMIN B-6: 17 MG

An essential B vitamin that is needed for normal development and brain function, as it supports healthy brain cells and nerve signaling. B6 is also required to form healthy neurotransmitter chemicals for balanced mood, calmness, attention, restfulness, and well-being.

COFFEE CHERRY EXTRACT: 1750 MG

The bright red fruit surrounding the raw, green coffee bean. Multiple scientific studies show that it supports brain cell regeneration and overall cognitive function. It also contains trace amounts of caffeine and can create stable, long-lasting energy without the jitters or the crash.

TAURINE: 1500 MG

A conditionally essential sulfur-containing amino acid, Taurine is necessary for your metabolic and digestive processes. It also supports brain function, energy production, a healthy mood, and combats exercise-related fatigue.

OOLA SHOT

It's not just energy...
it's Smart Energy.
